

Uneck Classic Hooded Sweatshirt

Specification

The Uneck Classic Hooded Sweatshirt is a pullover that can be used all year round but with a fabric weight of 300 gsm it has the durability to serve as winter wear.

The Uneck Classic Hooded Sweatshirt goes further by giving you a brushed fabric making the cotton-poly blend even softer.

The hood is double-layered and two needle stitching is used for toughness as well as lycra to make the cuffs snug. Reactive dye is used no matter what colour you choose for superior fade resistance. A nice touch is the taped neck which is extra fabric between the hood and the sweatshirt body for additional comfort.
